

GLADIATOR[®]

by Whirlpool Corporation

STEEL

- ❏ Measure and cut GearTrack[®] and / or GearWall[®] Panels.
- ❏ GearTrack[®] Channels can be installed straight onto horizontal 61/60 Top Hats/Top Span that are structurally located in metal sheds.
- ❏ When drilling in the screws on 61/60 Top Hat start at the centre of the GearTrack[®] and GearWall[®].
- ❏ The next two points are located half the distance from the centre to the end (each side of centre) Finally 10-20mm in from both ends.
- ❏ Ensure your Gladiator[®] wall system is level before affixing your second screw and periodically check that your GearTrack[®] and or GearWall[®] Panels are level.
- ❏ When installing GearWall[®] Panels onto sheds, vertical top hats are required.
- ❏ When installing GearWall[®] Panels start from the bottom and work up.
- ❏ Check to see that all screws are in every slot location when you are using GearTrack[®] and or GearWall[®] Panel on the structural studs.
- ❏ **Tools Required**
 - Marking pencil
 - Measuring tape
 - Level
 - Cordless drill with a Phillips Head or a Phillips Head screw driver
 - Hand saw or circular saw
 - Colour matched metal screws
